

FUTURE WORK

- I will search few existing models to simulate and will get the results to compare -*April 10th*
- I want to propose my technique of concatenate the vision transformer model with RESTORMER or PYRAMID VISION TRANSFORMER model - *April 19th*
- I will compare proposed technique results with four or five existing techniques with and without ground truth images - *April 20th*
- I will generate the image quality metrics like BRISQE, PIQE and NIQE in table format for the dataset does not having ground truth images, also i will compare these quantitative results with exiting models
- I will generate the image quality metrics like PSNR and SSIM in table format for the dataset having ground truth images, also i will compare these quantitative results with exiting models - *April 25th*
